

Eastern Ontario Crop Diagnostic Day 2010 – July 20th

The Eastern Ontario Crop Diagnostic Day is a co-operative effort between the Ontario Ministry of Agriculture, Food and Rural Affairs, the Eastern Ontario Crop Advisory Committee and the Kemptville Campus, University of Guelph. The Eastern Ontario Crop Diagnostic Day is an annual event held the 3rd Tuesday in July, designed specifically to improve the problem solving skills of seed, fertilizer and chemical industry personnel, agricultural consultants and farm managers. Certified Crop Advisor credits are available for most sessions.

The Eastern Ontario Crop Diagnostic Day provides growers and agri-business personnel with “hands-on” learning experiences to assist in the correct identification and treatment of crop problems common to eastern Ontario. The program provides a “real-world” environment where agriculturists can hone their crop trouble-shooting skills and evaluate new and alternative management strategies.

This year’s topics included:

- Weed Identification
- Weed ID, Diagnostic Challenge
- Corn Nitrogen Application Techniques, N losses
- Soybean - management for profit
- Field Crop - pest management
- Spring Cereal Management
- Corn & Soybean Weed Control
- Weed Control in New Forage Seedings
- Preplant Burndown Options
- Tillage, Rotation and Soil Health
- Forages - harvest management
- Effects of Spray Water Volumes

Over 350 participants attended the Eastern Ontario Crop Diagnostic Day in 2010.
