

2020 Nomination Form

Nominating a Soil Champion

The Soil Champion award is an annual award that recognizes strong advocates of sustainable soil management. Individuals from one of two general groups can be nominated:

- Those engaged in practical agriculture in developing, using and promoting management that contributes to the sustainable productivity of the soil; or,
- Research or extension professionals whose work demonstrates a commitment to advancing soil health and productive sustainability.

One Soil Champion winner will be declared for 2019 by the selection committee and announced at the OSCIA Annual Meeting in February.

An individual may nominate him/herself or be nominated by a third party. If you are nominating someone else, please ensure he/she is informed of your intentions and is a willing participant.

Eligibility:

To be eligible for the Soil Champion Award, an individual must be a resident of Ontario and have contributed to soil management in a way that improves soil health, and supports sustainable crop production and is environmentally friendly.

Practices that may be considered include:

- Minimal use of tillage – primary tillage is not eligible
- Protect and enhance organic matter, soil biota and soil aggregation
- Efficient and careful use of nutrients
- Effective surface water management
- Windbreaks and land retirement
- The advancement of science and advocacy for soil care.

To typically accomplish these objectives in most cropping systems, full-surface non-inversion tillage must be limited to a two-inch (51 mm) depth or less, and practiced no more than once every three cropping years. No primary tillage across the full working width of the equipment would be permitted.

THE DEADLINE FOR SUBMISSIONS IS NOVEMBER 1, 2019
