

Resolution #3 – Elgin SCIA – Nitrogen High Yield Research

WHEREAS Nitrogen fertilizer costs and emissions are top of mind, and;

WHEREAS N response data does not include the high yields (greater than 220 bu) that many growers now achieve.

THEREFORE, BE IT RESOLVED that OSCIA continue to support Nitrogen research in high yield environments and look at nitrogen loss potential and participation in the DIFM initiative.

MOVED BY John Poel SECONDED BY Terry Small
Elgin

Carried.

ACTION: A response letter was sent to Elgin SCIA outlining three initiatives that OSCIA is currently engaged in supporting Nitrogen research in high yield environments. Further opportunities or suggestions were encouraged to be sent to research@ontariosoilcrop.org.
